This train is really fun to drive and looks very nice. It is fairly similar to the BR 426 (the train included in the Munich to Garmisch - Partenkirchen route), but does sill look different. Overall I would recommend the loco (especially when on sale).. This whole finding things genre has never been my thing, but the story in this was worth it. Great atmosphere and the visuals are quite pleasing. I can run Fallout 4 just fine

This shouldn't lag to hell because there's more than 3 enemies on screen

Other than that it's pretty fun and challenging but I'm not going to tolerate this. low effort cr@p. fyi, the earth rotates on its own.. Interesting, because I find plane simulators usually hella boring. This one's at least interesting.. nice game, i liked the creatures and the ambience was also well done...

more from the artwork would be nice and more levels i played a few hours in the end

i was a little bit disappointed. It's ok. But I CANT GET THE DARN HOG!!!. The app is ok, and i dont have much to say about that. My problem is that all songs created with the app are imediatly licensed under the app, making it illgal to post the music to most websites, ruining the whole point of making a song. If you want to create music and publish it, i reccomend using something else.. I can't get a good feeling on my T500RS wheel but it seems good graphically. not ssure it's worth the \u00a330 but it is a good ssim with good potential. Just no. Very weak narration, not much logic connecting all the actions. Plus, somehow I got the game confused and could not complete it - some items were removed from my inventory before I used them in all places (lighter).

Nice graphics though.

There are better in this genre.

Very simple yet visually appealing rts. Buy it!. "It's like Trackmania in a cartoon world with a redbull as fuel."
Just like I said it has a "BIG" Touch off trackmania feeling in it. But for the fun part you have more air control and a bigger challenge than just staying on the ground.

There are a few down notes in this game and first off all are the controls... They are pretty weird and also you can't use them all at once normally. So I changed them to the normal race game setup:

W - Forward
S - Reverse
A - Left
D - Right
Spacebar - "Hand" Brake
Shift - Boost / Jet

That way you can use only the left hand for that part.

For the other keys I left them the same due you need to stabilize your car with the "Up" and "Down" keys, and basic "R" for restart of course.

Also, It would be awesome if you had a trackbuilding mode. So players can create and share their tracks on the steam workshop page. Maybe an update for the future.

For the rest the game looks good enough for its goals, so far.

So simple said: 8/10 Not the best "Race" game but still fun to do for a couple tracks each day.. This is pretty simple:

- game not finished (seriously)
- campaign does stop at a certain quest (?)
- clone of Sid Meyer's Pirates, but worse (Gets boring very quickly, 15h in, I will not touch this again)
- I don't feel like a merchant playing this
- no love for detail (why wouldn't you see your mercenaries in the animated caravan window, while they are represented on the main menu background; interesting idea with different city descriptions, but no real impact on trading; absolutely no surprises in the game; combat system is bad and unbalanced...)
- I believe early access should at least give a sneak at what the game should be, this is like a graphic worksheet. (Yes I do believe I could redesign the whole trading system in a tabulator)
- I actually think the graphics are well made (nothing revolutionary though)

I'm sorry, this is seriously bad, get Sid Meyer's Pirates, it's as cheap, but a real game.

. its pretty damn good at what it does. Fun singleplayer boardgame. A nice challenge. Event and dice based, fantasy/medieval/supernatural theme. Playthrough's differ by enemy cult(5), story(7) and operative(8) and can take about an hour, or so, for a successful run. I enjoyed it enough to play through them all.
